EtherCAT®

- identical control technology provided as with EPxxxx EtherCAT Box modules (e.g. process variables, CoE,...)
- The communication can easily switch between EtherCAT and EtherCAT P and vice versa as required.
- EPP modules enable significant savings → the hardware requirements in terms of control cabinets, terminal boxes and power leads are reduced.
- The tried and tested design of the modules which are made of robust plastic and fully sealed ...
- ... enables the use directly at the machine, even in wet, dirty or dusty environmental conditions.

EPPxxxx-006x

EtherCAT P Box modules with a very compact form factor

BECKHOFF

- flexible topology configuration with EPP13xx junctions
- The current carrying capacity of 3 A per EtherCAT P segment for U_S and U_P enables a wide range of sensors and actuators to be used.
