在XPE中设置FTP

Monday, April 28, 2014 3:58 PM

1. 在XPE中设置ftp

命令行输入services.msc,打开services管理界面。 在services中双击FTP publishing,将服务设置成automatic,点击start开启服务。如下图设置完成后的ftp 服务。

Services	
Publishing	ANDERSONAL
	Ante Description Status Start
the service	BDHCP Client Manages n Stantad
rt the service	Distributed Transac Coordinate Manu
	Bond Client Resolves a Started Auton

Window Help TP Publishing Pr General Log On Service name: Display name: Description: Path to executal C:\windows\sys Startup type: Service status: Start You can specify from here.	

2. 见下图,选择属性。弹出设置对话框

FTP Site Directory	this resource, the content should com a directory located on this comput a share located on another comput	e from: er iter
Local Path:	c:\inetpub\ftproot	Browse
	マ Read マ Write マ Log visits	
Directory Listing St	le	
C UNIX ●		
MS-DOS ●		

4. 以上设置完成后,需要对防火墙进行设置否则FTP无法访问。 选择相应的网络端口,点击properties-advanced-setting-general选择OFF

neral Support	Local Are connection Properties	
Connection Status: Duration: Speed: <u>More information</u>	General Advanced 4 Lim Windows Firewall Protect my computer and network by limiting Settings or preventing access to this computer from the Internet	
	Windows Firewall	
Packets: 2	Windows Firewall is helping to protect your PC Windows Firewall helps protect your computer by preventing unauthorized users from gaining access to your computer through the Internet or a network.	
Properties	C On (recommended) This setting blocks all outside sources from connecting to this computer, with the exception of those selected on the Exceptions tab.	
	Don't allow exceptions	
	Select this when you connect to public networks in less secure locations, such as airports. You will not be notified when Windows Firewall blocks programs. Selections on the Exceptions tab will be ignored.	J
	Select this when you connect to public networks in less secure locations, such as airports. You will not be notified when Windows Firewall blocks programs. Selections on the Exceptions tab will be ignored.	

5. 添加ftp 端口

properties-advanced-setting-**exceptions-add prot** 在弹出的对话框内输入如下图内容。

Windows Firewall General Exceptions Advanced Windows Firewall is blocking incoming n programs and services selected below. A to work better but might increase your se	etwork connections, except for the dding exceptions allows some programs curity risk.	
Programs and Services: Name File and Printer Sharing FTP RUTTO	Add a Port Use these settings to open a port through W number and protocol, consult the documenta want to use.	indows Firewall. To find the port tion for the program or service you
IPCDiagUAPort Microsoft Management Console Remote Assistance Remote Desktop TwinCAT ADS (bf02) TwinCAT ADS (bf03) UPnP Framework	Name: FTP Port number: 21	P
Add Program Add Port	What are the risks of opening a port? Change scope Firewall blocks a program	OK Cancel

6. 设置访问接口

properties-advanced-setting-advanced,选择想应的端口,点击settings勾选ftp server

General Exceptions Advanced Network Connection Settings Windows Firewall is enabled for the exceptions for an individual connect ✓ Local Area Connection	connections selected below. To add tion, select it, and then click Settings: Settings
El Local Alea Connection 2	Advanced Settings
	Services ICMP
Security Logging You can create a log file for trouble ICMP With Internet Control Message Prol computers on a network can share information.	Select the services running on your network that Internet users can access. Services FTP Server Internet Mail Access Protocol Version 3 (IMAP3) Internet Mail Access Protocol Version 4 (IMAP4) Internet Mail Server (SMTP) Post-Office Protocol Version 3 (POP3) Remote Desktop Server (UTER)
Default Settings To restore all Windows Firewall set click Restore Defaults.	in Secure web Server (HTTPS) ↓ Web Server (HTTP)

7. 测试ftp功能,如果FTP可以访问。按第四步操作,将防火墙开启。
