TcHmiFrameworkControlSvgHandling

This is a sample Framework Control project, that shows how to handle SVG files inside a Framework Control. The sample shows two different ways:

- Static use in Template.html: In the Template.html is shown, how to use an SVG graphic directly inside the Template.html.
- Dynamic use in Source.js: In the Source.js is shown, how to dynamically add SVG files to the elements of the Template.html.

Please follow the comments in the sample.
